STAINO® TECHNOLOGY

Developed jointly with world-renowned **DUPONT** and **Dedeco**, the dental industry's leading manufacturer of abrasive polishers, we are able to blend ultra-fine white aluminum oxide abrasive particles into micro-thin nylon filaments and latex-free rubber to create our unique interdental brushes, dental floss, tooth stain eraser and now iCLEAN® stain removing prophylaxis angle, latch & screw type cups.

As a result, unlike other manufacturers' standard filament and polishing products which work solely on the basis of friction, STAINO® products – taking advantage of the abrasive particles used by dentists for decades – are scientifically proven to safely remove surface stains while simultaneously more effectively removing food particles and plaque.

SEM Micrograph (500X) STAINO® Filament with Abrasive Particles

FEATURED & ENDORSED

WHAT'S NEW

It is with great pride that we introduce i CLEAN® and incorporate it into the STAINO® family of products.

i CLEAN® is the world's first and only disposable prophylaxis angle and prophylaxis cups that effectively clean, polish and remove stains.

Proven safe for enamel and gums, the micro-fine aluminum oxide abrasive particles uniformly blended within the "soft" flexible rubber cups ensure effective performance on all tooth surfaces – facial, lingual, interproximal & subgingival.

Eliminates spot stains even when used without prophylaxis paste. Splatter is virtually eliminated and visibility during cleaning is markedly improved – a more efficient process for hygienist and patient alike.

CONTINUING SUCCESS

We are also proud of the ever-increasing popularity and world-wide success of our interdental brushes, dental floss – including Flossbox® and Floss 'n Toss® – as well as the Tooth Stain Eraser which is a #1 seller on Amazon.com.

The scientific studies are undeniable – STAINO® technology clearly outperforms the competition.

Thank you for your support of our products – it is truly appreciated.

i CLEAN® Testimonials

"Just love it! Stain removal is so much easier - especially in combination with my regular paste. Great time saver! This product is a true game changer."

Lizzy RDH - Boston, MA

"My hygienist can't stop raving. Over the years she tried every brand on the market and never found any remotely comparable. Her job is easier and our patients happier."

Rachel DDS. - New York, NY

STAINO® offers the industry's widest range of interdental models for convenient at-home and on-the-go use.

No matter the task – be it removing plaque and food particles between and around teeth, bridge abutments, implants and braces or removing tobacco, coffee, red wine, cola and other tooth surface stains – STAINO® offers the ideal, shape and size interdental brush and easy to use handle to work quickly and efficiently.

FOR TIGHT TO WIDE SPACES

SAFE FOR BRACES AND IMPLANTS

REDUCES GINGIVITIS

FREQUENTLY ASKED QUESTIONS

WHY ARE STAINO® INTERDENTAL BRUSHES UNIQUE?

Ultra-fine white aluminum oxide – a proven dental stain removing abrasive – is blended within the nylon bristles for faster more effective plaque and stain removal. Other manufacturers' interdental brushes are just nylon and work solely on the basis of friction.

IS THE ALUMINUM OXIDE ONLY IN THE GREEN-COLORED BRISTLES?

No, it is blended in all the bristles, green and white. The green band simply makes it easier to identify a genuine STAINO® Interdental Brush.

WHY ARE STAINO® INTERDENTAL BRUSHES BETTER?

The ultra-fine white aluminum oxide in STAINO® bristles remove plaque and difficult stains much faster while simultaneously whitening tooth surfaces.

WHAT TYPE OF STAINS DO THEY REMOVE?

Surface stains commonly caused by tobacco, coffee, tea, red wine, cola and red sauce.

TOBACCO

COFFEE/TEA

WINE

COLA

RED SAUCE

ARE STAINO® BRUSHES SAFE?

Absolutely. In both laboratory and clinical studies STAINO® Interdental Brushes have conclusively been proven safe.

ARE THE WIRES PLASTIC COATED?

Yes, therefore also safe for cleaning around implants.

WHAT IS THE SIGNIFICANCE OF THE COLOR-CODE?

The different colors on the packages and brush handles identify the various shapes and sizes of the brushes.

HOW MANY SHAPES AND SIZES ARE AVAILABLE?

Five. Two shapes. Three sizes.

WHY SHOULD I USE STAINO® INTERDENTAL BRUSHES?

STAINO® Interdental Brushes are the most effective in removing plaque and difficult stains between teeth, where most staining and decay occur between professional cleanings.

STAINO® brushes also reduce gingivitis as part of a good oral hygiene program and supplement regular professional care.

TWINS®

Patented Dual-Ended Handle

STAINO®'s patented dual-ended handle feature stackable aerated caps for better control and greater reach. Convenient for at-home and on-the-go use, TWINS® are available by individual shape and size.

TWINS®
Testimonial

"Using these is an easy way to follow my dentist's cleaning between-the-teeth recommendation. They can be taken on trips and are easy and convenient either at home or away."

MINIS® CLEAN TIGHT SPACES BETWEEN TEETH

Small yet sturdy, our MINIS® micro-fine brushes are ideal for on-the-go use. Compact and conveniently packaged 10 per "matchbook", our MINIS® patented breakaway design is a proven favorite.

MINIS® Testimonial

"I've tried several brands and these are the best of the lot as far as being small enough to get between your teeth, yet still firm enough to be useful. They prevent build-up of plaque between your teeth, which cuts down on cavities!"

James - New York, NY
